

ULTRACOMFORT®  
ULTRATRIM®

## C O M F O R T

The Midmark UltraComfort® Dental Chair is designed to offer unparalleled patient comfort. With its fully contoured back and specially designed lumbar support, the UltraComfort® Chair was created to assist in keeping patients supported and comfortable through even the lengthiest of procedures.

Available in your choice of seamless Silhouette, plush Ultraleather® and a limited seams version of Ultraleather® upholstery.

Midmark's renowned quality starts at the core with superior components. A cast iron lift structure provides outstanding strength and stability. The robust, cast aluminum backrest is designed to cradle the patient to aid in making them more comfortable and secure while the hydraulic drive system provides smooth, quiet and precise operation.

## Features

The patented, integrated armrests not only provide essential support, but are designed to allow for unencumbered patient entry and exit. The double articulating headrest is designed to comfortably support and accurately position the patient for full access while the optional magnetic headrest provides additional neck support and permits side to side movement of the head. Multiple chair controls are standard, featuring four programmable presets that helps make placing the chair and patient in your preferred position a cinch.

### Access

The Midmark UltraTrim® Dental Chair is designed to offer exceptional clinician access. We carefully plotted essential support areas for a wide range of body types, which allowed us to remove materials in just the right places. The result is a chair back that is narrower and 40% thinner than our standard chair back.

Available in your choice of seamless Silhouette, plush Ultraleather® and a limited seams version of Ultraleather® upholstery.

Chair back design is key to proper clinician positioning and patient access. While the UltraComfort® chair back is thin and narrow, It is designed to allow you to work in an ergonomically correct position. The UltraTrim® chair back takes this to a new level with a back so thin and so narrow that even direct patient access can be easily achieved.

We have tried our very best to accurately represent product colors in this brochure. However, due to the nature of printed media, the color of actual products may differ slightly from how they appear on your particular printed piece. In order to confirm your color selection, we strongly recommend that you contact the Midmark Dental Customer Experience Department at 1-800-MIDMARK to request a sample before placing your order.
